

FLUSH SILHOUETTE SWITCHES  
Ø22 SWITCHES & PILOT LIGHTS  
CW SERIES

# Push-in Switches & Pilot Lights

Smart design, simple wiring

IDEC CORPORATION

## All thoughts focused on the same goal

Since the late 1970s, IDEC has continued to instill and pursue “Save and Safe”, as part of our corporate DNA. Along with the rapid advancement in machine intelligence and demands for environmental resistance and high reliability in recent years, we need to face societal issues such as shortage in workforce.

To solve these issues, we have set as our goals “Safe, Simple & Smart= $S^3$  (S cube)”, aiming to provide society with products and services that will bring about greater innovation and lasting quality.

# Safe

Products anyone can use with safety and assurance, from a company seeking to be number one in safety

# Simple

Products appreciated by all our customers for their ease of connection regardless of experience

# Smart

Products that make labor-saving and space-saving a reality

# Useful NEW

We provide easy and user-friendly products with new technology.

## First in the industry Six different colors with a single LED

Previously, 5 different color LEDs were required but with the new illuminated unit, only a single LED is used.

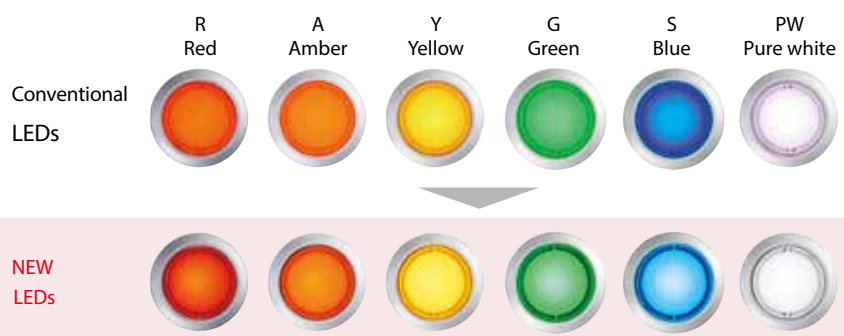

Only the lens needs to be replaced to change the illumination color.

The new LED reduces maintenance time, makes stock control easier, and is environmentally friendly.

## High visibility with new LED

Brighter and clearer compared  
to conventional LEDs

## ISO3864-4 Safety color compliant

(Corresponding colors: R (Red), Y (Yellow), G (Green), PW (Pure white))

Safety colors are defined with ISO standards.

The bright and clear colors are suited for emergency situations

# Push-in

Smart Simple

## Simple wiring for greater work efficiency

Ferrules and solid wires can be connected simply by push-in insertion, without a screwdriver. <sup>(\*)</sup> To remove, a flat-blade screwdriver is inserted in a simple two-action process. Since wiring can be performed regardless of operators' skill level, wiring time is reduced.

<sup>\*1)</sup> When connecting stranded wire, insert the wire while holding down the pusher with a flat-blade screwdriver.

Connecting  
Push the wire straight in as far as it will go.

Connection is completed. Pull lightly to make sure it is firmly in place.

Removing  
Hold down the pusher with a flat-blade screwdriver.

While holding down the pusher, pull out the wire. Release the flat-blade screwdriver.

Smart

## Time saving and efficient

Push-in connections are made simple by inserting the wire, reducing wiring time by approximately 55% compared to conventional screw terminals.

**[Conditions]**

Push-in: Insert wire with ferrule.

Screw terminals: With screw loosened, insert wire, then tighten with electric driver.

<sup>\*2)</sup> As of IDEC research (as of January 2020)

Safe

## Reliable and easy

Finger-safe structure and vibration resistance. What's more, the space-saving design means better workability in a smaller space.

### Stays firmly in place

Since the ferrule is held in place by a spring load, the wiring remains taut and vibration resistance is improved.

### Finger-safe structure

IP20 Finger-safe protection enables wiring to be performed without direct contact between screwdriver and conductive part.

Smart

Simple

## Wiring procedure comparison

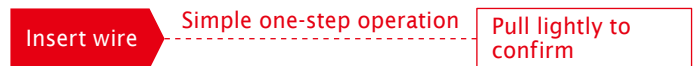

Work can be performed without using tools and regardless of operators' skill level.

\*1) When ferrule is used.

### Conventional screw terminal

### Push-in terminal <sup>(\*)</sup>

Smart

## No additional tightening needed

Because screws are not used on push-in terminals, re-tightening of screws is not required.

# Product Upgrade

The superior functions of the conventional CW Series still remain while improving ease of use.

## Contact block depth reduced

Smart

Saves space inside panel and enables downsizing of equipment.

### Pushbuttons

Single contact block

Panel depth

36.4mm

NEW

Double contact block

Panel depth

59.6mm

## Angled Connections

Smart

Angled connections make wiring easy even when switches are mounted on a panel.

Also, 24-degree inclination faced to the panel improves the fit of the wires, and contributes to downsizing of the panel and equipment.

NEW

## 4-contact configuration available with double contact blocks

Double contact blocks

Single contact blocks

Double contact blocks available for all models including pushbuttons, illuminated pushbuttons, selector switches, and key selector switches.

# Added Value

Our aim is to create products that enable customers to experience the utmost usability.

## Test point

A test point is available to check connectivity of the wiring.  
Check the connectivity easily using a tester.

## Sub-Assembled Units

Sub-assembled units can be ordered for flexible use, such as sudden changes in design.

# Flush Silhouette Switches

## ø22 CW Series Push-in Switches & Pilot Lights

### Products

Pushbuttons:	see page 10
Illuminated pushbuttons:	see page 13
Pilot lights:	see page 16
Selector Switches:	see page 18
Key Selector Switches:	see page 23

• See website for details on approvals and standards.

### Contact Ratings

Rated Insulation Voltage	300V
Rated Thermal Current	10A

### Rated Operating Voltage and Current by Utilization Category

#### [Specification 1] (\*1)

Rated Operating Voltage (Ue)			24V	48V	50V	110V	220V
Rated Operating Current (Ie)	AC 50/60 Hz	Resistive Load (AC-12)	10A	—	10A	10A	6A
		Inductive Load (AC-15)	10A	—	7A	5A	3A
	DC	Resistive Load (DC-12)	10A	5A	—	2.2A	1.1A
		Inductive Load (DC-13)	5A	2A	—	1.1A	0.6A

• The operational current represents the classification by making and breaking currents (IEC60947-5-1).

#### [Specification 2] (\*2)

Rated Operating Voltage (Ue)			24V	48V	50V	110V	220V
Rated Operating Current (Ie)	AC 50/60 Hz	Resistive Load (AC-12)	5A	—	5A	5A	3A
		Inductive Load (AC-15)	5A	—	3.5A	2.5A	1.5A
	DC	Resistive Load (DC-12)	5A	2.5A	—	1.1A	0.55A
		Inductive Load (DC-13)	2.5A	1A	—	0.55A	0.3A

• The operational current represents the classification by making and breaking currents (IEC60947-5-1).

• Minimum applicable load: 3V AC/DC, 5 mA (applicable range may vary with operating conditions)

\*1) See electrical life specification on page 9.

UL, c-UL rating: A300, CCC rating: A300, TUV rating: A300

### Degree of Protection (Table 1)

Type	IP65	IP66	IP67	UL Type 4X
Illuminated Pushbutton	Yes	No (*2)	No (*2)	No (*2)
Pilot lights	Yes	Yes	No	Yes
Pushbutton	Yes	No (*2)	No (*2)	No (*2)
Selector Switch	Yes	Yes	Yes	Yes
Key Selector Switch	Yes	Yes	No	Yes

\*2) Yes when used with rubber boot (CW9Z-D11, -D12)

### LED Specifications

Rated Insulation Voltage	250V			
Rated Operating Voltage	6V AC/DC	12V AC/DC	24V AC/DC	
Operating Voltage Range	6V AC/DC ±10%	12V AC/DC ±10%	24V AC/DC ±10%	
LED Module Part No.	CW-PAQ2	CW-PAQ3	CW-PAQ4	
Current Draw	AC	16 mA	7 mA	6 mA
	DC	12 mA	6 mA	6 mA
Life (reference value)	Approx. 30,000 hours (the illuminance is reduced to 50% of the initial intensity when used on complete DC at 25°C.)			
Internal Circuit				

### Push-in Contact Block (HW-P)

	Single contact block		Double contact block		
	1NO	1NC	2NO	2NC	1NO-1NC
Contact	1NO	1NC	2NO	2NC	1NO-1NC
Part No.	HW-P10R	HW-P01	HW-PW2R0	HW-PW02	HW-PW1R1
Housing	Blue / Black	Purple red	Blue / Black	Purple red	Purple red / Blue
Push Rod	Black	Red	Black	Red	Gray
Contact No.	3-4	1-2	1st stage: 13-14 2nd stage: 23-24	1st stage: 11-12 2nd stage: 21-22	1st stage: 13-14 2nd stage: 21-22
Weight (approx.)	8g		16g		

### Specifications

Operating Temperature	Non-illuminated: -25 to +60°C (no freezing) LED illuminated: -25 to +55°C (no freezing)	
Operating Humidity	45 to 85% RH (no condensation)	
Storage Temperature	-40 to +80°C (no freezing)	
Contact Resistance	50 mΩ maximum (initial value)	
Insulation Resistance	100 MΩ minimum (500V DC megger)	
Overvoltage Category	II (IEC60664-1)	
Impulse Withstand Voltage	2.5kV (IEC60664-1 / IEC60947-5-1)	
Pollution Degree	3 (IEC60947-5-1)	
Vibration Resistance	Operating extremes: 5 to 55Hz, amplitude 0.5 mm Damage limits: 30 Hz, amplitude 1.5 mm	
Shock Resistance	Operating extremes: 100 m/s <sup>2</sup> Damage limits: 1000 m/s <sup>2</sup>	
Mechanical Life (minimum operations)	Pushbutton/Illuminated pushbutton Momentary: 2,000,000 (single contact block) 1,000,000 (double contact block) Maintained: 250,000(single contact block) 100,000(double contact block) Selector switch: 250,000 (single contact block) 100,000 (double contact block) Key selector switch: 250,000 (single contact block) 100,000 (double contact block)	
Electrical Life (*1) (minimum operations)	Specification 1	Single contact block: 50,000 Double contact block: 25,000
	Specification 2	Single contact block: 100,000 Double contact block: 50,000
Degree of Protection	Panel front: See Degree of Protection table on page 8 Terminal: IP20 (IEC 60529)	
Electrical Shock Protection	Class II (IEC61140)	
Terminal Style	Push-in terminal	
Bezel Material	Polyamide	
Recommended Tightening Torque for Locking Ring	1.2 N·m	

\*1) Switching frequency  
 Momentary: 1800 operations/h  
 Maintained: 900 operations/h

### Direct Opening of Key Selector Switch

Applicable Type	2-position (3NC)	3-position (2NC)
Minimum Operator Angle for Direct Opening Action	90°	45°
Minimum Operator Torque for Direct Opening Action	0.2 N·m	0.3 N·m
Maximum Operator Angle	90°	45°

### Weight (Examples)

Weight (approx.)	Illuminated Pushbutton	: 38g (CW1L-M1P20Q4, 2 contacts)
	Pushbutton	: 37g (CW1B-M1P30, 3 contacts)
		: 61g (CW1B-M1P33, 6 contacts)
	Pilot light	: 24g (CW1P)
	Selector Switch	: 40g (CW1S-2P30, 3 contacts)
		: 64g (CW1S-2P33, 6 contacts)
	Key Selector Switch	: 49g (CW1K-2AP30, 3 contacts)
		: 73g (CW1K-2AP33, 6 contacts)

### Mounting Hole Layout

(Dimensions in mm)

#### Panel Cut (IEC60947-5-1)

Note: Determine mounting centers in consideration of the operation, wiring, and testing terminals.

Name / Shape	Operator position code Maintained 1 0 2	Contact Configuration (Code)	Part No. (Ordering No.) 
	Part No. (Ordering No.)		
Black 		2NO-2NC (22)	CW-CNP22
Metallic 	CW①K-3③-⑤-PS	4NO (40)	CW-CNP40
		2NO-2NC (22N2)	CW-CNP22N2

- Two keys are supplied. Key cylinder material: Metal
- For part no. other than maintained position, see Part No. Example on page 27.
- Specify a bezel color in place of ① in the part no.
- Specify a desired key removal position in place of ③ in the part no.
- Specify a key number in place of ⑤ in the part no.

} See page 27 Part No. Example for details.

- On the spring-returned types, the key can be released only from the maintained position. On the maintained types, the key can be released from every position.
- Key retained positions are also available. See page 27 for details.

**Contact Block Mounting Position**

Part No. (Ordering No.)/ mounting positions of contact units: page 30.

Key Selector Switches

• Contact unit includes a contact block, dummy block, and connecting unit.

**Note:** Specify the same contact configuration as the reference assembled part no.

## Sub-Assembled

All dimensions in mm

Illuminated Contact Unit Part No. / Contact Table Package Quantity: 1

Contact Configuration (Code)	Rated Operating Voltage	Part No. (Ordering No.)	Mounting Position	Contact
1NO (10)	6V AC/DC	CW-CNP10Q2	(1)	1NO
	12V AC/DC	CW-CNP10Q3	(2)	LED unit
	24V AC/DC	CW-CNP10Q4	(3)	Dummy
1NC (01)	6V AC/DC	CW-CNP01Q2	(1)	Dummy
	12V AC/DC	CW-CNP01Q3	(2)	LED unit
	24V AC/DC	CW-CNP01Q4	(3)	1NC
1NO-1NC (11)	6V AC/DC	CW-CNP11Q2	(1)	1NO
	12V AC/DC	CW-CNP11Q3	(2)	LED unit
	24V AC/DC	CW-CNP11Q4	(3)	1NC
2NO (20)	6V AC/DC	CW-CNP20Q2	(1)	1NO
	12V AC/DC	CW-CNP20Q3	(2)	LED unit
	24V AC/DC	CW-CNP20Q4	(3)	1NO
2NC (02)	6V AC/DC	CW-CNP02Q2	(1)	1NC
	12V AC/DC	CW-CNP02Q3	(2)	LED unit
	24V AC/DC	CW-CNP02Q4	(3)	1NC

- Illuminated contact unit includes a contact block, LED unit, dummy block, and connecting unit.

Contact Unit for Pilot Light Part No. Package Quantity: 1

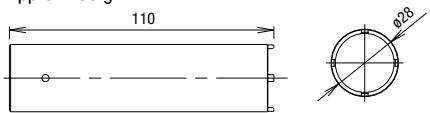

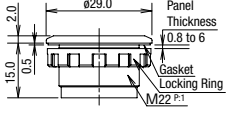

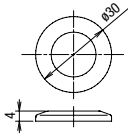

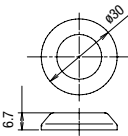

Rated Operating Voltage (Code)	Part No. (Ordering No.)	Mounting Position	Contact
6V (Q2)	CW-CNPQ2	(1)	Dummy
12V (Q3)	CW-CNPQ3	(2)	LED unit
24V (Q4)	CW-CNPQ4	(3)	Dummy

- Contact unit for pilot light includes one LED unit, two dummy blocks, and one connecting unit.

**Note:** Specify the same contact configuration as the reference assembled part no.

## Accessories

All dimensions in mm

Shape	Material	Part No.	Part No. (Ordering No.)	Package Quantity	Remarks
	Metal (Brass)	MW9Z-T1	MW9Z-T1	1	<ul style="list-style-type: none"> <li>• Used to tighten the locking ring when installing the CW series control unit in a panel cut-out.</li> <li>• Weight: Approx 150 g</li> </ul> 
	Polyamide (black)	LW9Z-BP1	LW9Z-BP1	1	<ul style="list-style-type: none"> <li>• Used to plug an unnecessary ø22.3 mm hole in the panel.</li> <li>• Degree of protection: IP65</li> <li>• Panel thickness: 0.8 to 6.0 mm</li> </ul>

LED module 	Rated Operating Voltage	6V AC/DC	CW-PAQ2	CW-PAQ2	1	Current draw	AC: 16 mA DC: 12 mA
		12V AC/DC	CW-PAQ3	CW-PAQ3			AC: 7 mA DC: 6 mA
		24V AC/DC	CW-PAQ4	CW-PAQ4			AC: 6 mA DC: 6 mA

**Maintenance Parts** (Used for replacement only. Do not use the maintenance parts to modify the CW series)

All dimensions in mm

Name / Shape	Material	Part No.	Ordering No.	Package Quantity	Remarks
Button 	① Round flush ø19.5 H3.5	<b>CW9Z-B11 *</b>	<b>CW9Z-B11*PN05</b>	5	For maintained pushbuttons.  Specify a button color code in place of * in the Part No. B (black), G (green), R (red), Y (yellow), S (blue), W (white)
	② Round extended ø19.5 H6.2	<b>CW9Z-B12 *</b>	<b>CW9Z-B12*PN05</b>	5	
Lens 	① Round flush ø19.5 H3.5	<b>CW9Z-L11*-K</b>	<b>CW9Z-L11 *-KPN05</b>	5	For illuminated pushbuttons. Specify a button color code in place of * in the Part No. R (red), G (green), Y (yellow), A (amber), C (clear), S (blue) Note: If the illumination color is PW (pure white), use a C (clear) lens.
	② Round extended ø19.5 H6.2	<b>CW9Z-L12*-K</b>	<b>CW9Z-L12 *-KPN05</b>	5	
Locking Ring 	Polyamide (black)	<b>CW9Z-LN</b>	<b>CW9Z-LNPN05</b>	5	—
Gasket 	Nitrile rubber	<b>CW9Z-WM</b>	<b>CW9Z-WMPN10</b>	10	Waterproof gasket between CW control unit bezel and the mounting panel. 
Spare Key 	Zinc (nickel-plated)	<b>LA9Z-SK-0H</b>	<b>LA9Z-SK-0HPN02</b>	2	Specify a key No. in place of □. 0H: Standard key (reversible) 1H to 2H: Reversible key 3H to 6H: Non-reversible key  • For dimensions, see page 28.
		<b>LA9Z-SK-□</b>	<b>LA9Z-SK-□PN02</b>		

**⚠ Safety Precautions**

- Turn off the power to the CW series switches & pilot lights before starting installation, removal, wiring, maintenance, and inspection of the products. Failure to turn power off may cause electrical shocks or fire hazard.
- For wiring, use wires of a proper size to meet the voltage and current requirements, and the number of connectable wires (page 39).

- Failure to tighten the terminal screws may cause overheating and fire.
- Avoid using in places mentioned below to maintain performance of the product.
  - Exposed to direct sunlight
  - Subject to corrosive or flammable gases

**Instructions**

**Notes for Operation**

- When using the CW series control units in a safety-related circuit of a control system, observe safety rules and regulations of each country concerning particular applications of the actual machines and facilities. Perform risk assessment before operation to ensure safety.

**Operating Conditions**

- In corrosive gas or high-temperature, high-humidity atmosphere, contact failure due to corrosion or color change or breakage of the housing may occur.
- Main parts of the CW series control units are made of plastic. Do not scratch the surface with a sharp object or apply excessive shocks or load, otherwise the control units may be damaged.
- In particular, keep the button, lens, and bezel from such damage, otherwise appearance and function may be impaired.
- Do not apply detergents, cutting oils, or chemicals which may impair the function and appearance of the CW series control units.

**Installing the Contact Unit**

1. Remove the contact block from the operator.
2. Remove the locking ring from the operator.
3. With the TOP marking of the operator facing upwards, align the anti-rotation projection on the operator with the recess in the mounting hole, insert the operator into the mounting hole. **TOP** When installing the nameplate, insert between the operator and the panel.
4. Tighten the locking ring from the rear of the panel.

**Pushbuttons and Illuminated Pushbuttons**

**Selector and Key Selector Switches**

**Removing and Installing the Contact Unit**

1. To remove the contact block from the operator, push the yellow locking lever and turn it to the left.
2. To install, align the TOP marking on the operator with the TOP marking on the contact block mounting adaptor, and turn the locking lever to the right.

**Notes for Panel Mounting**

**Locking ring wrench recommended torque**

Tighten the bezel to a tightening torque of 1.2 N·m

**Locking ring wrench**

Locking ring wrench (MW9Z-T1) can be used to tighten the bezel. Do not use pliers. Excessive tightening will damage the locking ring.

Locking ring wrench (MW9Z-T1)

**Mounting Hole**

1. Mounting hole dimensions are in compliance with IEC 60947-5-1.
2. If the anti-rotation projection is removed from the bezel, CW series control units can be mounted in ø22.3 mm mounting holes. To remove the anti-rotation projection, remove the gasket and use cutting pliers to break the projection. Also, make sure not to damage other parts of the operator.

**Instructions**

**Removing and Installing Contact Blocks, Dummy Blocks and LED Unit**

**Removing**

To remove the contact block, dummy block, and LED unit from the operator, insert a flat screwdriver under the latch and push down the screwdriver as shown below.

**Installing**

When installing the contact block or dummy block, make sure that it snaps on to the operator.

Note 1) Make sure to attach a correctly assembled connection unit to the operator.

Note 2) When attaching the contact block to the connection unit, make sure that the connection is detached from the operator. If a contact block is installed with the operator attached to the connection unit, malfunction of the switch may occur.

**Test Point**

Note) Do not insert wires to the test points.

**Single contact block**

Note) When conducting a continuity test, make sure that the probes (ø2.0 maximum) of the tester are inserted vertically to the panel.

Single contact block

**Double contact block**

When conducting a continuity test on the first deck, make sure that probes (ø2.0 maximum) of the tester are inserted in an angle of the contact block, in two places as shown below.

When conducting a continuity test on the second deck, make sure that probes (ø2.0 maximum) of the tester are inserted vertically to the panel.

(1) First deck test point

(2) Second deck test point

**Instructions**

**Removing and Installing Lens and Buttons**

**Pushbuttons (momentary)**

Momentary pushbutton caps cannot be removed. Do not tamper with the pushbutton caps using a screwdriver or pliers, otherwise the pushbutton caps may be damaged.

**Pushbuttons (maintained) / Illuminated Pushbuttons / Pilot Lights**

To remove the button or lens from a pushbutton, illuminated pushbutton or pilot light, insert a flat screwdriver under the flange of the lens at 90° from the TOP marking and twist the screwdriver.

Note) Insert the flat screwdriver by about an angle of 30°. Do not insert the screwdriver too deeply and do not apply excessive force to the lens, otherwise the bezel surface may be damaged.

Screwdriver Insertion Direction

Screwdriver Insertion Angle

**Installing the Lens**

Turn the groove in the lens to the TOP marking on the operator housing. With the groove aligned with the ridge, press the lens in.

**Marking**

Marking plates are not available for CW series illuminated pushbuttons and pilot lights. Marking film can be inserted to indicate legends.

**Applicable Marking Film Size**

All dimensions in mm

	Illuminated Pushbutton (Round Flush)	Illuminated Pushbutton (Round Extended)
Applicable marking film size		
Thickness: 0.2 mm maximum Note: Film is not supplied and must be prepared by the user. Film material:		

**Nameplate / Marking Plate**

**Installing the marking plate on a nameplate**

Insert a marking plate in the direction of the arrow ①, and press in as shown ②.

**Removing a Marking Plate**

Insert a flat screwdriver into the upper middle part of the marking plate and remove. When anti-rotation is not required, remove the projection from the nameplate using pliers.

Note: When using a nameplate, the mounting panel thickness is 2.6 mm maximum.

## Instructions

### Installing the Rubber Boot

When using in places where the switches are subjected to water splash or an excessive amount of dust, make sure to use the optional rubber boot.

1. Remove the gasket from the operator, and mount the rubber boot to cover the bezel as shown in the below diagram (Do not use a washer).
2. Fit the rubber boot to the bezel of the operator as shown in the diagram of the completed operator below.

#### Notes

- Attach the rubber boot by making sure that the front round part (A) of the rubber boot is concentric with the lens and button. Otherwise the appearance may look different.
- Make sure that the rubber boot is properly fitted, otherwise, the waterproof and dustproof characteristics are not ensured.

Note: Install the rubber boot before mounting the unit to the panel.

### Key Selector Switches

To prevent malfunctions and damage, take the following precautions.

- Insert the key to the bottom before turning.
- Do not remove the key while turning.
- Besides the standard key (0H), six other keys are available. Use a key with a key that matches the number on the key cylinder. However, for standard keys, the key number is engraved on the key but not on the key cylinder.
- Keys are available in two shapes. Key numbers 0H (standard), 1H, and 2H are reversible keys. Key numbers 3H, 4H, 5H, and 6H are non-reversible keys. Make sure of correct insertion direction.

### Maintained Switches

Do not replace the button/lens while the operator is latched. Otherwise the internal structure will be damaged.

### Selector Switches

Turn the selector operator or key securely to each position.

### Applicable Wire

When wiring, use the applicable wires shown below.

#### Applicable Wire and Specifications

Applicable Wire (*1)	0.25 to 1.5mm <sup>2</sup> (AWG16 to 24)
Wire Strip Length (*2)	8 ± 1mm (*3)

\*1) For applicable wires confirmed by IDEC, see website.

\*2) For details on ferrules, see "Wire Size and Recommended Ferrules" table below.

\*3) Strip the sheath of the wire 8±1mm from the end.

Note: Make sure that the stranded wires do not loosen when using wiring without ferrules.

### Wire Size and Recommended Ferrules

#### Ferrules without insulated covers

Applicable Wire (Stranded Wire)		Wire Strip Length	Weidmüller Recommended Part No.
AWG	mm <sup>2</sup>		
24	0.25	5 to 6mm	H0.25/5
20	0.50	10 to 11mm	H0.5/10
18	0.75	10 to 11mm	H0.75/10
18	1.00	10 to 11mm	H1.0/10
16	1.50	10 to 11mm	H1.5/10

Note) Above ferrules cannot be purchased from IDEC.

#### Ferrules with insulated covers

Applicable Wire (Stranded Wire)		Wire Strip Length	IDEC Part No.
AWG	mm <sup>2</sup>		
24	0.25	10 to 11mm	S3TL-H025-12WJ
22	0.34	10 to 11mm	S3TL-H034-12WT
20	0.50	10 to 11mm	S3TL-H05-14WA
18	0.75	10 to 11mm	S3TL-H075-14WW
18	1.00	10 to 11mm	S3TL-H10-14WY
16	1.50	10 to 11mm	S3TL-H15-14WR

### Recommended Crimping Tool (Optional)

Item	Weidmüller Recommended Part No.
Crimping tool	PZ 6 Roto L

Note 1) Note the crimping dimensions when using tools other than the recommended crimping tool. For details, see page 38.

Note 2) The above crimping tool cannot be purchased from IDEC.

### Recommended Screwdriver (Optional)

Item	IDEC Part No.
Flat blade screwdriver	S3TL-D04-20-60
	S3TL-D04-25-75

Note ) Use a flat blade screwdriver with a blade size of 0.4×2.5 mm.

Instructions

Wiring Procedure

Connecting the wire

1) Stranded wires with ferrules or solid wire

- ① Insert the wire to the back of the wire port.
- ② After wiring, tug lightly to make sure that the wire is properly connected.

2) Stranded wire

- ① While pressing the pusher using a flat blade screwdriver (recommended optional screwdriver: S3TL-D04-20-60 or S3TL-D04-25-75), insert the wire fully in the wiring port. Wire is connected when the pusher is released.
- ② After wiring, tug lightly to make sure that the wire is properly connected.

Crimping of Ferrules and Wiring

- Choose an appropriate ferrule for the wire.
- Cut the wire carefully to get a flat end.
- Make sure that ferrule sleeve is completely filled by the conductor. Depending on the cross section, the conductor should protrude approx. 0 to 1 mm from the ferrule sleeve.

- When crimping, refer to the instructions of the crimping tool.

Faults which can occur during crimping:

- Cracks along the sides and die impressions
- Splitting of the ferrules
- Asymmetrical crimping shape
- Extreme burrs formed along the sides
- Ferrule not filled by conductor
- Single conductors pushed back by protruding from the insulated cover
- Single conductors squeezed off
- Insulated cover damaged by the crimping jaw
- Conductor insulation not pushed into the insulated cover
- Ferrule bent longitudinally after crimping

## Instructions

### Crimping dimensions: W2.4×H1.9 mm

Maximum connectable crimping size is W2.4×H1.9. Make sure that the ferrule size will be smaller than this dimension.

(Recommended crimping tool: PZ 6 Roto (optional) Weidmüller)

Note 1) If a tool other than the recommended crimping tool is used, the ferrule may not be crimped to the appropriate size and the clamp or spring inside the contact block may be deformed and may not operate normally.

Note 2) Pin crimp terminals cannot be used.

### Removing the Wire

When removing the wire, push the pusher using a flat blade screwdriver (recommended optional screwdriver: S3TL-D04-20-60, see page 33) and pull wire out in the direction of the arrow.

#### <Notes>

- Operate the pusher with a force of 20N. Do not press excessively. Otherwise, the switch may be damaged.
- Do not pull the wire out without depressing the pusher. When pulling the wire, be sure to pull in a straight direction. Otherwise, the socket may be damaged.

### Number of Connectable Wires

Unit	Connectable wires		No. of connectable wires
HW-P Contact block	Solid wire	0.25 to 1.5mm <sup>2</sup> (AWG16 to 24)	2
	Stranded wire	0.25 to 1.5mm <sup>2</sup> (AWG16 to 24)	
LED unit	Ferrule	Without insulated cover 0.25mm <sup>2</sup> :conductor length 5 to 10mm 0.5 to 1.0mm <sup>2</sup> :conductor length 6 to 10mm 1.5mm <sup>2</sup> :conductor length 8 to 10mm With insulated cover 0.25 to 1.0mm <sup>2</sup> :conductor length 6 to 10mm 1.5mm <sup>2</sup> :conductor length 8 to 10mm Note) Pin terminals cannot be used	

Note) Only one wire can be inserted into one wire port.

## Ordering Terms and Conditions

Thank you for using IDEC Products.

By purchasing products listed in our catalogs, datasheets, and the like (hereinafter referred to as "Catalogs") you agree to be bound by these terms and conditions. Please read and agree to the terms and conditions before placing your order.

### 1. Notes on contents of Catalogs

- (1) Rated values, performance values, and specification values of IDEC products listed in this Catalog are values acquired under respective conditions in independent testing, and do not guarantee values gained in combined conditions.  
Also, durability varies depending on the usage environment and usage conditions.
- (2) Reference data and reference values listed in Catalogs are for reference purposes only, and do not guarantee that the product will always operate appropriately in that range.
- (3) The specifications / appearance and accessories of IDEC products listed in Catalogs are subject to change or termination of sales without notice, for improvement or other reasons.
- (4) The content of Catalogs is subject to change without notice.

### 2. Note on applications

- (1) If using IDEC products in combination with other products, confirm the applicable laws / regulations and standards.  
Also, confirm that IDEC products are compatible with your systems, machines, devices, and the like by using under the actual conditions. IDEC shall bear no liability whatsoever regarding the compatibility with IDEC products.
- (2) The usage examples and application examples listed in Catalogs are for reference purposes only. Therefore, when introducing a product, confirm the performance and safety of the instruments, devices, and the like before use. Furthermore, regarding these examples, IDEC does not grant license to use IDEC products to you, and IDEC offers no warranties regarding the ownership of intellectual property rights or non-infringement upon the intellectual property rights of third parties.
- (3) When using IDEC products, be cautious when implementing the following.
  - i. Use of IDEC products with sufficient allowance for rating and performance
  - ii. Safety design, including redundant design and malfunction prevention design that prevents other danger and damage even in the event that an IDEC product fails
  - iii. Wiring and installation that ensures the IDEC product used in your system, machine, device, or the like can perform and function according to its specifications
- (4) Continuing to use an IDEC product even after the performance has deteriorated can result in abnormal heat, smoke, fires, and the like due to insulation deterioration or the like. Perform periodic maintenance for IDEC products and the systems, machines, devices, and the like in which they are used.
- (5) IDEC products are developed and manufactured as general-purpose products for general industrial products. They are not intended for use in the following applications, and in the event that you use an IDEC product for these applications, unless otherwise agreed upon between you and IDEC, IDEC shall provide no guarantees whatsoever regarding IDEC products.
  - i. Use in applications that require a high degree of safety, including nuclear power control equipment, transportation equipment (railroads / airplanes / ships / vehicles / vehicle instruments, etc.), equipment for use in outer space, elevating equipment, medical instruments, safety devices, or any other equipment, instruments, or the like that could endanger life or human health
  - ii. Use in applications that require a high degree of reliability, such as provision systems for gas / waterworks / electricity, etc., systems that operate continuously for 24 hours, and settlement systems
  - iii. Use in applications where the product may be handled or used deviating from the specifications or conditions / environment listed in the Catalogs, such as equipment used outdoors or applications in environments subject to chemical pollution or electromagnetic interference  
If you would like to use IDEC products in the above applications, be sure to consult with an IDEC sales representative.

### 3. Inspections

We ask that you implement inspections for IDEC products you purchase without delay, as well as thoroughly keep in mind management/maintenance regarding handling of the product before and during the inspection.

### 4. Warranty

- (1) Warranty period  
The warranty period for IDEC products shall be one (1) year after purchase or delivery to the specified location. However, this shall not apply in cases where there is a different specification in the Catalogs or there is another agreement in place between you and IDEC.
- (2) Warranty scope  
Should a failure occur in an IDEC product during the above warranty period for reasons attributable to IDEC, then IDEC shall replace or repair that product, free of charge, at the purchase location / delivery location of the product, or an IDEC service base. However, failures caused by the following reasons shall be deemed outside the scope of this warranty.
  - i. The product was handled or used deviating from the conditions / environment listed in the Catalogs
  - ii. The failure was caused by reasons other than an IDEC product
  - iii. Modification or repair was performed by a party other than IDEC
  - iv. The failure was caused by a software program of a party other than IDEC
  - v. The product was used outside of its original purpose
  - vi. Replacement of maintenance parts, installation of accessories, or the like was not performed properly in accordance with the user's manual and Catalogs
  - vii. The failure could not have been predicted with the scientific and technical standards at the time when the product was shipped from IDEC.
  - viii. The failure was due to other causes not attributable to IDEC (including cases of force majeure such as natural disasters and other disasters)

Furthermore, the warranty described here refers to a warranty on the IDEC product as a unit, and damages induced by the failure of an IDEC product are excluded from this warranty.

### 5. Limitation of liability

The warranty listed in this Agreement is the full and complete warranty for IDEC products, and IDEC shall bear no liability whatsoever regarding special damages, indirect damages, incidental damages, or passive damages that occurred due to an IDEC product.

### 6. Service scope

The prices of IDEC products do not include the cost of services, such as dispatching technicians. Therefore, separate fees are required in the following cases.

- (1) Instructions for installation / adjustment and accompaniment at test operation (including creating application software and testing operation, etc.)
- (2) Maintenance inspections, adjustments, and repairs
- (3) Technical instructions and technical training
- (4) Product tests or inspections specified by you

The above content assumes transactions and usage within your region. Please consult with an IDEC sales representative regarding transactions and usage outside of your region. Also, IDEC provides no guarantees whatsoever regarding IDEC products sold outside your region.
